About Me

I am a Data Enthusiast with a strong focus on Marketing Analytics, valuing analytical thinking, adaptability, and continuous learning. Through hands-on projects in FMCG Regional Marketing Performance Analysis, Customer Churn Analysis, and Retail Demand Analysis, I have explored sales trends, customer behavior, and regional market performance. My project work includes data cleaning, exploratory data analysis, and dashboard development, with one analysis identifying a 39.39% increase in sales from September to December. I have developed technical skills in SQL, Excel, Google Sheets, Tableau, and BigQuery, alongside problem-solving, critical thinking, collaboration, and attention to detail. I aim to turn data into meaningful insights that help businesses understand their customers and make informed marketing decisions.

Education

Universitas Pelita Harapan **Aug 2024 - Present**

Bachelor's Degree, Information Systems | GPA: 3.62 / 4.00

- Competition Participant, Technical Project Contributor, Collaborative Problem-Solver

RevoU Full Stack Data Analytics (FSDA) **Jun 2026 - Oct 2026**

- Data Understanding, Data Cleaning, Exploratory Data Analysis, Business Analysis, SQL, Python, Excel, Spreadsheet

Project Experiences

Customer Churn Analysis | RevoU Full Stack Data Analytics (FSDA) **Aug 2026 - Oct 2026**

Analyzed product-related factors and customer behavior to identify patterns associated with product returns and customer churn, assessing their potential impact on revenue.

- Performed date-based feature engineering and customer behavior analysis to examine annual purchase frequency and customer retention patterns. The analysis showed an annual non-churn rate exceeding 79%.
- Developed dashboards to examine customer behavior and churn patterns. The analysis identified that customers aged 18–57 accounted for 18%–19% of total orders, highlighting potential customer retention risks.
- Used Excel to perform descriptive analysis and identify customers with higher churn rates from 2020–2023, with 2020–2022 ranging 5.39% to 5.4% and 2023 at 3.98%, helping mitigate potential revenue and loyal customer declines despite stable churn.
- Developed interactive sales and product dashboards in Tableau, consolidating 142,641 orders and 24,451 customers to reveal a 20.21% churn rate and age-group behavior patterns, enabling management to pinpoint high-risk segments more accurately.

Retail Demand Analysis | Tata – Job Simulation (Forage)

Analyzed product and customer demand across different regions to identify sales patterns and evaluate potential market expansion opportunities.

- Conducted sales trend analysis and identified a 39.39% increase in sales from September to December, highlighting regional sales growth patterns.
- Compared revenue and sales volume trends to assess business performance, identify growth patterns, and evaluate the relationship between sales volume and revenue.
- Analyzed Tableau international markets excluding the UK to identify growth opportunities, highlighting that the Netherlands, Ireland, Germany, and France led unit sales and revenue, enabling strategic prioritization for greater market share and regional growth.
- Analyzed the top 10 customer purchasing patterns in Tableau to evaluate revenue concentration, finding the highest spender generated only 17% more than the second customer, confirming low bargaining power and a well-diversified revenue base.

FMCG Daily Sales Data 2022-2024 | (Kaggle) **Oct 2026 - Present**

Analyzed daily-level Fast Moving Consumer Goods sales transactions for three consecutive years from 2022 to 2024 to find interesting insights

- Executed PostgreSQL data profiling and exploratory analysis, leveraging complex queries to uncover critical customer behavioral trends and key insights that drove data-driven decision-making.

Skills

Technical Skills: Data Profiling, Data Cleaning, Exploratory Data Analysis, Business Recommendation, Data Visualization, Database Querying

Soft Skills: Collaboration, Problem Solving, Attention to Detail, Analytical Thinking, Domain Knowledge, Critical Thinking

Languages: Bahasa Indonesia, English

Software: SQL, Excel, Google Sheets, Tableau, BigQuery

Certifications

IT Specialist - Data Analytics, Issued by Certiport **Jun 2026**

Data Visualisation: Empowering Business with Effective Insights Job Simulation, Issued by Forage
